---- Sonic Branding (Part of a Sonic Branding Project) ----

Definition

Sonic branding involves creating distinct and cohesive audio assets that represent the brand, including audio logos, themes, variations of themes, and assets of varying lengths for different applications.

Ownership

- All assets created as part of a Sonic Branding project are sold on a buyout basis, meaning the client owns the copyright and usage rights in full.

Changes

Any modifications to the originally agreed sonic branding brief will incur additional charges.

Indemnification

If the client reproduces, recreates, or produces a "sound-alike" version of a reference track against WithFeeling's advice and subsequently broadcasts such compositions, the client agrees to indemnify, defend, and hold WithFeeling harmless against any claims, losses, damages, or expenses (including attorney's fees and litigation costs) arising from a breach of copyright.

Usage and Rights Certificate

Upon project completion, WithFeeling will issue a Usage and Rights Certificate confirming the client's full ownership of the sonic branding assets.
